MIDEL eN 1204

Safety and performance from a natural source.
MIDEL protects life, property and the environment.
It saves money while enabling innovation. It's MIDEL.
It's safety inside.

MIDEL eN 1204 is our rapeseed oil based natural ester transformer fluid.

MIDEL is the acknowledged leading brand of ester transformer fluid. Since the 1970s MIDEL has been used in hundreds of thousands of installations worldwide, providing unrivalled fire safety, environmental protection, increased asset performance and real cost savings.

MIDEL eN 1204's thin film rate of oxidation is half that of soya-based fluids, thus offering greater tolerance if exposed to air.

MIDEL eN 1204 is a natural ester dielectric fluid designed to provide an alternative to mineral oil, silicone liquid and dry-type transformers.

MIDEL eN 1204 has a high fire point, significantly increasing the fire safety of your transformers and reducing the need for fire protection equipment.

MIDEL eN 1204 is sustainably sourced and readily biodegradable, avoiding environmental damage should leakage occur and enabling reductions in containment measures.

MIDEL eN 1204 is an effective solution for non free-breathing transformers.

MIDEL eN 1204 has a pour point around 13°C lower than the soy-based natural ester making it a better choice in cooler climates.

MIDEL eN 1204 has a high moisture tolerance. This characteristic enables the extension of cellulose insulation life.

MIDEL eN 1204 is currently used in a wide range of transformer applications and is ideal for non free-breathing transformers located indoors or outside.

MIDEL eN 1204 offers the ability to safely increase transformer loading or reduce transformer size.

Transformer fires are a frequent occurrence in the world's power networks. Such fires are notoriously unforgiving, spreading very quickly and causing extensive damage, sometimes involving loss of life. MIDEL eN 1204 offers a proven solution in terms of fire risk mitigation.

MIDEL's engineers and chemists have built close working relationships with end users and the major transformer manufacturers. They are also active in IEEE, CIGRÉ and IEC working groups and regularly undertake extensive projects with industrial associations and academic bodies. Such depth of experience allows the MIDEL team to provide an unrivalled level of expert technical guidance.

MIDEL eN 1204 - manufactured using renewable vegetable oil, readily biodegradable, providing fire safety and environmental protection from a natural ester.

MIDEL eN 1204

Fire and environmental protection in a natural ester fluid

MIDEL eN 1204 is an excellent dielectric fluid because it has a high fire point, making it demonstrably safer than mineral oil. It is also one of the most environmentally friendly dielectric fluids available; not only is MIDEL eN 1204 manufactured using renewable vegetable oil (rapeseed), it is also non-toxic and readily biodegradable. In addition, MIDEL eN 1204 offers superior moisture tolerance and has the potential to increase the lifetime of cellulose based solid insulation, which in turn can extend transformer life.

INCREASED FIRE SAFETY

- 100% fire safety record
- High fire point (>300°C)
- K-class classification: Less flammable fluid
- Designed for indoor and outdoor installations

GREATER ENVIRONMENTAL PROTECTION

- Renewable vegetable oil
- Lower carbon footprint than mineral oil
- Readily biodegradable
- Non-toxic
- No corrosive sulphur

SUPERIOR MOISTURE TOLERANCE

- Absorbs large amounts of moisture with no reduction of breakdown voltage (up to 300ppm)
- High saturation limit (1100ppm @20°C) making precipitation of free water virtually impossible

ASSET LIFE EXTENSION

- Slower rate of cellulose ageing than mineral oil
- Longer cellulose lifetime at standard temperatures
- Option to run at a higher temperature, for a standard lifetime
- Provides a higher power output, without the need for high temperature insulation

ENABLES INNOVATION

- Allows for compact transformer design
- Permits greater flexibility and temporary overload resilience

Any recommendation or suggestion relating to the use, storage, handling or properties of the products supplied by M&I Materials Ltd or any member of its group, either in sales and technical literature or in response to a specific enquiry or otherwise, is given in good faith but it is for the customer to satisfy itself of the suitability of the product for its own particular purposes and to ensure that the product is used correctly and safely in accordance with the manufacturer's written instructions.
