

Cables Solutions

New Zealand's most highly trained team of accredited experts, superior craftsmanship, and a full suite of world-class equipment

It's the way we're wired

Optimising cable performance and cost effectiveness demands not only the highest level of technical expertise, but also a total commitment to careful craftsmanship – PBA offers its clients both.

When you are looking for a leader with the full suite of specialist cable services, for both HV and LV, above or below ground, you can trust PBA to get the job done to an accredited standard. PBA people are also qualified to work on live equipment, including LV jointing.

The PBA cables team are hands-on experts trained to a high standard. This includes ongoing offshore factory training with a range of industry-leading OEMs. Our people are also passionate about quality, as reflected in a standard of craftsmanship appropriate for these crucial interconnections between valuable assets.

This combination of capabilities and wide industry knowledge make us strongly focused on network integrity. This helps to ensure system longevity, reliability and cost effectiveness.

So if you need a high standard of professionalism and know-how, get the PBA Cables team on the job. We are industry experts in the field, and our in-depth understanding means we can give you the level of specialist support you need.

PBA Cables clients benefit from:

- A flexible and highly responsive service
- The most highly trained team available in New Zealand
- Staff trained and accredited in Pfisterer, 3M, Coopers, Nexan and Raychem
- Multi-trade skills provide the ability and willingness for staff to broaden their scope of works at short notice, without the need for additional trade resources to be dispatched to site. Associated electrical fitting work can be carried out by PBA's cable team
- Entry and Permit authorities, along with work type competencies, for a wide range of asset owners throughout the generation, transmission and distribution sectors
- The full suite of HV and LV cable services; see the back of this brochure for more detail
- Cost-effective outcomes through overall industry knowledge
- The ability to work on live/energised equipment when required
- Jointers who can carry out pre- and post-installation testing as required

THE HIGH VOLTAGE EXPERTS

Cables services

PBA Cables offers our clients the full range of specialist cable services.

These include:

- Cable installation and all/any associated works
- Cable testing (including VLF) and condition assessments
- Cable jointing and termination, including the full suite of quality and safety documentation templates
- Commissioning of HV and LV cables and associated equipment

Each of these services is supported by the full suite of world-class testing equipment, including a VLF (Very Low Frequency) dedicated cable tester:

Enjoy peace of mind

PBA's clients enjoy the peace of mind that comes from working with a provider strongly focused on full regulatory compliance and adherence to technical standards.

We also tick all the other boxes that give our clients the reassurance they need:

- ✓ Proactive minimisation of health and safety and environmental risks
- ✓ Efficient, cost-effective, transparent solutions that optimise smooth operations and minimise plant downtime and cost
- ✓ Working with people who bring leading industry accreditations and proven results, and who speak our clients' language

PBA's knowledge spans the high voltage system

PBA brings leading practical, in-depth expertise, spanning all aspects of the high-voltage system; going beyond compliance and proactively developing innovative risk management and mitigation solutions for our clients.

In the electricity industry PBA covers the whole spectrum, from major projects to specialist services and support solutions. The breadth and depth of applied high-voltage expertise that we offer is unique.

This leadership position is underpinned by our:

- People's care and commitment to excellence and quality outcomes
- People's ability to bridge management/procurement and technical/field personnel
- Technical innovation, impeccable professional standards and industry connections
- Agile and mobile services, superior support and long-run commitment.
